

A close-up photograph of a person's hands holding a large amount of dark brown, fibrous soil. Below the hands is a black plastic seedling tray with multiple compartments, some of which are filled with the same soil. The background is slightly blurred, showing more of the tray and some green plants in the distance.

SUSTRATOS

PERLITA

Mineral de origen volcánico que mediante altas temperaturas se expande. Proporciona aireación óptima para la propagación de plantas y una retención de agua adecuada para el desarrollo radicular.
